Setting new standards in fast-charging EV technology

High Power Charger 350kW

What sets NHP apart?

The Delta HPC 350 is now available for use on highways and in service stations in Australia and New Zealand. This cutting-edge charging solution offers unparalleled speeds and efficiency for EV owners.

- Efficient performance up to 96.5% and minimises installation space, ensuring minimal impact on parking planning.
- Satellite design enables installation without replanning parking spaces.
- Operational excellence, supporting OCPP and network connectivity for seamless integration with payment and backend systems, enabling real-time monitoring and efficient maintenance.
- Rapid charging, with an industry-leading 540A output enabling charging speeds up to 350kW. In just 10 minutes, drivers can add 250 to 300 km of range, making it ideal for long-distance travel and enhancing charger turnover at highway rest stops and urban charging hubs.

NHP's skilled EV service team provides:

- Comprehensive upstream infrastructure support
- Commissioning service to guarantee optimal performance from day one
- Dedicated service and maintenance support.
