

# Installed Base Evaluation (IBE)

With a completed IBE and access to the My Equipment portal, you will have a total understanding of your lifecycle risk by site, area, line, machine and panel.

This will help ensure you have the right parts, in the right place, at the right time.

## Installed Base Evaluation

Audit of the installed equipment and spares inventory across your plant.

## Full inventory analysis

Comprehensive analysis by catalogue number, lifecycle, line/location, MTBF and inventory condition.

## Minimise downtime and reduce inventory levels

Identify unnecessary and obsolete inventory, avoiding unnecessary replenishment, and identify the correct spare parts.

## Avoid obsolescence

Flexible inventory benefits of an optional parts management agreement allow you to stock critical spare parts.

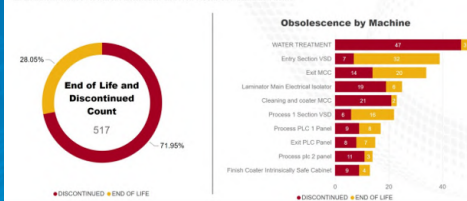

## Actionable intelligence and analysis

An Installed Base Evaluation is much more than simply counting parts. It's a thorough analysis of your critical plant assets and their condition.

This service provides knowledge to help you make data-driven decisions regarding the support and obsolescence management of your installed base assets in real time with **My Equipment**.

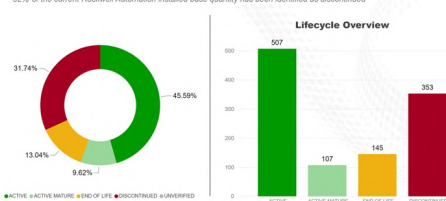

### Legacy Products Risk by Machines

Evaluation includes Rockwell Automation and Non-Rockwell Automation items

### Rockwell Automation Lifecycle Status

32% of the current Rockwell Automation installed base quantity has been identified as discontinued

Transform your asset management with **My Equipment** subscription

**My Equipment** provides intuitive dashboards and reporting tools that give you complete visibility of your assets, enabling you to:

### Reduce operational costs

- Lower inventory carrying costs
- Build spares strategies
- Reduce data collection costs

### Decrease enterprise risk

- Gain instant visibility into product cybersecurity vulnerabilities
- Assess and mitigate obsolescence risk
- Receive proactive alerts for devices impacted by obsolescence status change and product safety advisories

### Improve asset utilisation

- Enhance device availability for critical inventory
- Enable compatibility planning
- Reduce downtime associated with extended device replacements

**Help ensure you have the right parts, in the right place, at the right time.**
