Emergency lighting life cycle services

Reduce time and delays during every step in the cycle

Your business efficiency depends on your choices. By engaging the NHP Services and solutions team, you can focus on what you do best, while your emergency lighting system runs smoothly. With your equipment performance optimised and maintained, your cost control improved, it's your way towards less unplanned downtime and easier maintenance budgeting.

Delivered maintenance services

This is the essential maintenance to prolong the lifetime of your assets while ensuring compliance. We take precise maintenance actions, including providing quality parts.

AS/NZS 2293 regulatory testing services

We provide you with a detailed test report of your site's emergency lighting system every 6 months to ensure AS/NZS 2293 compliance all year round. The test report also contains a list of recommendations to ensure your occupants are safe for any emergency.

Technical support

Expert help is only a phone call away, with technical telephone assistance and rapid troubleshooting advice available in relation to your emergency lighting system.

Cost reduction services

Your investments improve performance when effectively used on a day-to-day basis. We share our expertise to further reduce operational costs by recommending the most efficient lights on the market.

On-site response time

For those times when you need help and you need it now, one phone call is all you need to have an expert on-site within the agreed time.

Install and commissioning services

- Commission new systems as a whole or fitting by fitting to work at a time of your choosing.
- Work with on-site trades to ensure correct installation of new fittings in the right location.
- Full commissioning report provided after completion.

Upgrade services

- Provide site audits and propose recommendations.
- Design assistance with the latest energy efficient products.
- Upgrade to either Nexus® RF (wireless) or Nexus LX (data cable) systems in various stages.
- One system at a time.
- One fitting at a time based on failure.

Maintenance and support services

- Carry out audits, inspections and fault finding services to existing systems or sites.
- Repair, replacement and re-testing of faulty fittings.
- Provide on-site or remote support.

Routine testing services

- Carry out audits, inspections and testing services.
- 6 and 12 month discharge testing in accordance with AS/NZS 2293.
- Logbook reporting to demonstrate AS/NZS 2293 standards compliance.
